

Your Health & Lifestyle Center

Expanded, Modernized, and Improved

Dear TCC Gold/Silver Members:

Your new Health & Lifestyle Center is forecasted to open in November. We can all be very proud of this well-timed new enhancement to The Commons Club. Your membership includes Beach Club gulf breezes, outdoor/to-go Rookery Dining, a newly landscaping lakeside green, and soon – one of the most expansive fitness centers in Southwest Florida. Over the next few weeks, via this communication, you will be introduced to the expanded and updated facility, modernized equipment, and the strenuous health safeguards we have put in place. Welcome back to TCC!

Project Progress

Schedule Update

The Health & Lifestyle project was originally scheduled to start on April 15th. Due to the Covid19 emergency, after considering the potential risks, the project started on May 6th – with an estimated six-month window of construction. As of today, September 21st, the reopening date is scheduled for late November.

Progress Update

Starting in mid-September, drywall installation in the renovated areas was completed and painting started. Renovation work also started in the lobby including drywall adjustments and the installation of new lighting. In the newly expanding space, exterior windows and doors have been installed. Because of shipping challenges, the delivery of interior doors is delayed until the end of September. Roof drains are now being mounted – after a short delay in design and engineering. Once drains are finished, the area will be dried in and the installation of drywall will start. This portion of the project is causing an approximate two-week delay. On the exterior of the building, the application of stucco has started. Painting and landscaping plans have been approved and will commence in late October.
