

Your Health & Lifestyle Center

Expanded, Modernized, and Improved

Dear TCC Gold/Silver Members:

Your new Health & Lifestyle Center is forecasted to open late next month. This communication will continue to introduce you to the expanded and updated facility, modernized equipment, and the strenuous health safeguards we have put in place.

Safety and Sanitation Safeguards

The Commons Club has engaged electrostatic sprayers in each of our buildings and at the Beach Club. Electrostatic spray disinfecting is the process of spraying an electrostatically charged mist onto surfaces and objects. After the spray is applied, the disinfectant goes to work on the entirety of all surfaces. It only takes 1 to 5 minutes depending on the disinfectant used; killing 99.99% of all pathogens. Its effective and touchless application means zero cross-contamination. Electrostatic spray disinfecting works by using a specialized solution that is combined with air and atomized by an electrode inside the sprayer.

Additional information and a time lapse of project photos/videos may be found on the [club's website](#). Questions and comments may be forwarded to the Club's General Manager, Joseph Archazki at: josepha@thecommonsclub.com or Health & Lifestyle Director, Mary Johnson at: maryj@thecommonsclub.com
